

Hot Tar Work Ahead on River Oaks Streets

Site Engineering will begin tarring cracks in the subdivision on Tuesday, March 28th.

The work will commence with work in Phase 1 (Woodberry Drive, Turnberry Drive & Bent Tree Court).

After Phase 1 they will go to the back of the subdivision to do work in Phase 5 and Phase 6. That includes Bradford Court, Lantana Court, Carissa Court, Hardy Dive, Andorra Lane, Needlepoint Lane and River Oaks Drive from Hardy Drive to Carissa Court.

After completing those streets they will work their way to the front to complete the remaining streets. The project will take about seven (7) days spread over a two week period. Total time frame may be extended due to weather.

Please be careful while driving in the work area.
